### Other Information

This list is for emergency or small printing amounts of less than 50 units  
 Jpgs work best at 300 dpi or higher, but can work with 180 dpi. The higher the better  
 If a photo needs to be scanned, I charge \$3 per page  
 Glossy usually works best for cards with lots of color  
 Art prints are on deluxe luster paper with an 8 color process that shouldn't fade for years  
 The print can also be sealed in an archival spray for an additional \$10
